I had tried several brands of tire sealants and found that they all had drawbacks. The biggest problem being that the wheels rusted, and secondly, the loss of ability to seal punctures after a few thousand miles of being in the tire.

I'm happy to say that Ultraseal is by far the best sealer that we have ever installed. To date, the tires treated with your product have passed the test of time. There has been no reports of rusting wheels or punctures that did not seal. April 25, 2000

I wanted to see if your product would do what you claimed it would, such as allowing the tires to run cooler. So I treated one of the big rigs that hauls coal down some pretty steep grades. These trailers carry as much as seventy tons of weight on them, and the tires get so hot they are destroyed by the high temperatures that they are exposed to.

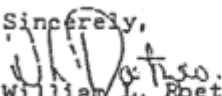

So we put your product to the test. When we got at the bottom of the grade, we pulled over and checked the tires with an infrared heat sensor gun and let me tell you "you've made a believer out of me". The tires ran up to 35 degrees cooler, plus we have seen a vast reduction in flat tires. O.J. Miller April 28, 2000

Jersey Bandag Inc

Jersey Bandag, Inc., has been using Ultraseal in all type of fleet operations. Our customers include Waste Haulers, State Department of Transportation, Public and Private Landfills, Public Works Departments, School Districts, Landscapers, construction Companies, Hazardous Waste Removers, Cable Company fleets, GPU Nuclear, Jersey Central Public Utilities and long and short haul Owner Operators.

We would like you to know that Jersey Bandag, Inc, through the use of Ultraseal Tire Life Extender has shown Fleet Managers, Transportation Directors and "Hands On" Maintenance Personnel, how to lower their cost per mile of operation. We have proven to our customers that Ultraseal reduces Flat Repairs, Air Loss, improves Casting Longevity and overall tire performance.

We are proud to be an Ultraseal Distributor.

Take Care,

Anthony Marone, Jr.
Vice President and General Manager
Jersey Bandag, Inc.

DETROIT RECYCLING CENTRE

Detroit recycling processes over one million scrap tyres annually. During the operation our mobile equipment is exposed to bead wire making flat tyres a problem.

We were averaging 20 flats per week. Since we began using ULTRASEAL in early 1997, flats have been reduced by 90%. In fact ULTRASEAL paid for itself in the first month.

We are believers and strongly recommend its use.

Sincerely,

Frank J. Mangiapane
President/Owner

World Cup Rally 2002

We recently completed our second World Cup Rally in an old Citroen 2CV this time from Oxford to Athens.

We think we were the only car on the Rally that didn't have to change any tyres! We look forward to using Ultraseal next year, as it seems to remove another hassle when you are competing against the clock in outlandish places. Well done.

Simon Chance

Dear Brian

We have now been using your ULTRASEAL tyre sealant and tyre life extender product in our fleet of rental motorhomes and campervans for over 15 months.

Our fleet averages about 1.3 million kilometres a year and since the installation of this product, we have been able to achieve an average of a 37% increase in tyre mileage across the 3 various vehicle types we run in our fleet. We have been able to reduce our tyre pressure and maintenance checking time to a minimum which has resulted in a faster turnaround of vehicles. The extra tyre life we are experiencing is directly attributable to the fact that the tyres are not losing pressure due to punctures or porosity while the vehicles are on hire.

Over 90% of our hirers come from off shore and a very large proportion of them have never driven a vehicle the size of a campervan or motorhome before and to most, the complexity of checking tyre pressures especially on the inner dual wheels is beyond them.

Since the installation of ULTRASEAL, we have not had any of our hirers stopped on the side of the road as a result of a puncture in the tread area of any of our vehicles. Because of this we have not had disgruntled hirers wanting refunds for time lost and we have not been faced with costs for call outs or for having to have tyres replaced.

Due to the outstanding results we have achieved, since installing ULTRASEAL I am very pleased to endorse this product and I would be happy to talk to anyone about our results.

Yours faithfully

Paul J Miller
